## Vibrating Grizzly Feeders

The feeding surfaces of vibrating grizzly feeder are composed of blind-plates and bars. This kind of feeder is mainly used for well-distributed large-size ores before entering crushers. It is especially designed for feeding ferrous or non ferrous metal ore, construction stone materials when

they are rough or mid-crushed. It has features of smooth vibrating, reliable in operation, long service life, easy maintenance, high strength, impact-resisting, wear-resisting, and low noise.

Overall Size Width X Length	Max. Feed Size (mm)	Vibrating Frequency Per minute	Capacity (t/hr)
36" x 12'	220	800	200 – 220
46" x 16'	300	800	250 – 280
70" x 16'	630	700	350 - 380
89" x 16'	630	750	350
100" x 20'	750	500 - 800	400 - 560
